## **PLF LTD – Carbon Reduction Intent**

As a specialist brickwork subcontractor based in the North West of England, **PLF LTD** recognises the critical role our industry plays in addressing climate change. Following our recent carbon emissions assessment in partnership with **Carbon Neutral Britain**, we are proud to have achieved **Carbon Neutral status for 2023/24**, offsetting our total emissions of **172.85 tonnes of CO<sub>2</sub>e**.

This is the first step in our long-term environmental commitment. In alignment with the **UK Government's Net Zero targets** and **Science-Based Targets initiatives**, we are committing to the following actions:

---

### **Our Climate Commitments**

- **50% Reduction by 2030**  
We are targeting a 50% reduction in our carbon emissions by 2030, equating to a cut of 86.43 tCO<sub>2</sub>e from our baseline year (2023/24).
- **Net Zero by 2050**  
We are fully committed to achieving Net Zero emissions by 2050 through continued measurement, reduction, and offsetting efforts.

---

### **Key Focus Areas for Emissions Reduction**

To meet these targets, PLF LTD will prioritise reducing emissions from our three highest contributing sources:

1. **Company Vehicles**
  - Gradual transition to low-emission or electric vehicles
  - Fleet management systems to optimise routes and reduce unnecessary travel
  - Implementation of eco-driver training to improve fuel efficiency

## 2. Combustion Sources (e.g., machinery, generators)

- Upgrade to energy-efficient and electric-powered equipment where feasible
- Introduce operator training for efficient usage
- Explore use of lower-emission fuels like biodiesel

## 3. Electricity Usage

- Shift to energy-efficient lighting, appliances, and smart systems
- Promote hybrid working and evaluate office downsizing to reduce consumption
- Investigate relocation to energy-efficient premises if needed

---

### Transparency and Reporting

We will publish an updated Carbon Emissions Report annually, openly communicating our progress towards emission reductions and adjustments to our strategy where required. Our commitment includes full transparency in data reporting and ongoing improvement.

---

### Looking Ahead

2025 represents a key milestone for PLF LTD as we embed carbon reduction at the heart of our operations. Our strategy goes beyond compliance — it reflects our core values and long-term commitment to future generations. By taking meaningful action and working closely with trusted partners, we aim to set a positive example across the construction industry.

---

**Signed,**

*The Directors of PLF LTD*
